

### **Vinyl**comfort

### Ultimate Luxury with the comfort of cork

Nature at your feet

Cork is a natural material that comes from the bark of the cork oak tree, with unique and incomparable qualities that no ingenious human has yet managed to copy or improve. Its cell structure resembles a honeycomb, enabling it to act as a natural thermal and sound insulator and also providing shock absorbing properties.

These exclusive qualities of cork make it ideal to use in flooring, as it grants an exceptional comfort while also being a renewable and sustainable resource.

Over the years, Wicanders has developed floor and wall coverings with exclusive properties due to its innovative Corktech technology.

By using a unique engineered multilayer structure, which combines state of the art technology with the exclusive natural properties of cork, a higher standard in flooring was achieved, providing the perfect match between beauty, comfort and durability.

Vinylcomfort floors accomplish the ultimate luxury with highly detailed vinyl designs that result in realistic and sophisticated reproductions of wood and stone textures.

The uniqueness of **Vinyl**comfort floors was achieved by integrating a prime quality core layer of cork, which provides superior comfort, noise reduction and warmth. An integrated cork underlay reinforces thermal and acoustic properties, resulting in a silent environment and important energy cost savings.

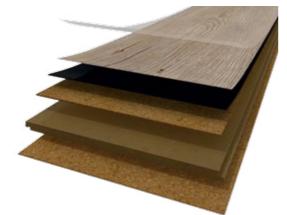

Solid vinyl core

Agglomerated cork Step sound reduction, warmth & comfort

High density fiberboard

Insulating cork underlay Impact sound reduction & thermal reinforcement

# More than just a beautiful floor

### More **silence**

quieter and peaceful environment.

### More warmth

The unique thermal insulation features of cork provide an optimal floor temperature all year round, assuring a more warm and comfortable ambiance with energy cost savings.

Softer than wood and harder than carpets, the perfect mix to absorb heel strike impacts, relieving leg and back stress, but stable enough to help the foot impulse and decrease the walking fatigue.

### More impact resistance

**Vinyl**comfort floors have the ability to bounce back from hard impacts, which makes them very robust and increases the life span of the flooring.

Cork's natural properties make it an excellent sound absorber. **Vinyl**comfort floors reduce noise transmission between and within rooms, creating a

### More walking comfort

Vinylcomfort floors are very comfortable to walk on due to cork's natural and inherent flexibility providing a unique comfort in movement. Even when walking barefoot, a sense of cosiness is felt.

### More **body wellness**

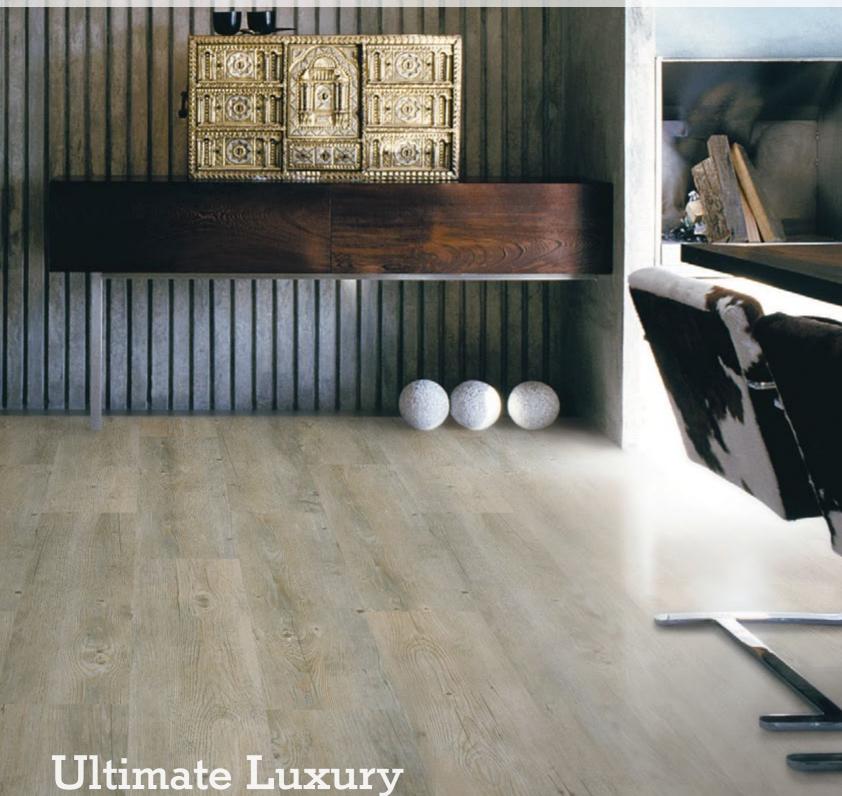

### Realistic & Durable

The remarkable enduring beauty

### Warm & Comfortable

Feel a warm and pleasant touch under your bare feet

Quiet & Healthy

# The sublime balance of Vinyl with Cork flooring

The sublime balance was achieved. This contemporary technology combines the luxury of vinyl designs with the unique comfort of cork, accomplished with an excellent reproduction of natural textures.

The realistic wood and stone visuals of this collection, with all the benefits of cork inside, are the perfect choice to create comfortable, warmth and peaceful atmospheres.

#### **Floating** solution

With the glueless Corkloc® installation system, simply put the planks together and securely click them into place. It is a very quick, safe and clean solution.

The stone visuals are available in a tile format of  $605 \ge 445$ mm or a board format of  $905 \ge 295$ mm. All the wood visuals are available in the elegant plank of  $1220 \ge 185$ mm.

High resolution printed film..... Decorative visual

**Solid vinyl layer** 1,2mm..... Core layer

Agglomerated cork 1,5mm ..... Step sound reduction, warmth & comfort

HDF - High Density Fiberboard with Corkloc  $^{\circ}$  6mm - Quick & easy installation

Integrated cork underlay 1,2mm..... Impact sound reduction & thermal reinforcement

0,3 mm wear layer For domestic and light commercial areas

#### Glue down solution

The glue down solution with its 6mm thickness can be applied on top of almost any existing surface, being ideal for renovation projects. Its strong and balanced structure reduces the telegraphing effect, which means that subfloor irregularities don't pass through. It only requires the use of one side acrylic adhesive, providing a faster installation.

This solution is available with an elegant plank dimension of 1230 x 150mm with 4 sides beveled and a 0,55mm wear layer.

Protective wear layer 0,55mm with embossed texture ...... Easy maintenance & extra resistance

# Natural realistic look!

#### Rich textures for an intense and natural realism

Specific surface textures were developed in order to offer a remarkable realism for every type of floor. Smooth, grained or brushed – inspired by the most traditional wood & stone working techniques – **Vinyl**comfort floor touches your desire with its luxurious look.

**Moonscape Stone** Delicate small rims resembling the moon surface.

**Volcanic stone** A soft and sophisticated structure.

**Sliced stone** The gross stone strong texture.

### Authentic embossed texture for a natural look and feel

With the registered embossing revolutionary technology, Wicanders is able to perfectly synchronize impressive surface textures to each luxurious design intensifying the feeling of depth. The result is a high quality floor where the natural textures can hardly be told apart from real materials. Four amazing designs were created to suit all kind of styles.

**Century** A rustic pine with knots that inspires iconic ambiances with centuries past.

**Grained stone** A natural smooth and fine touch.

**Fine pore wood** A plain appearance surface with a smooth touch.

**Brushed wood** A strong wood texture with a brushed effect.

**Castle** A brushed antic oak that will add unique and authentic rustic character to any space. Synchronized perfection of wood grain and knots

#### Arcadian

A washed weather-beaten alpine larch that give a rustic flare in any modern space.

#### Sawn

A sawn white washed oak, ideal to add contrast to a modern interior design or to underline a rustic country style.

### Light shades

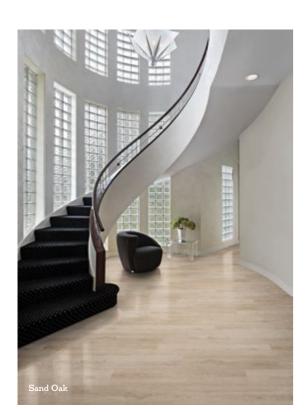

#### Creating light and space

The light shades bright up and amplify spaces, providing a pure and serene atmosphere. Due to its extreme versatility it is the perfect choice for the base of modern decorations.

Light Beech

Coal Slate B0O1001 - 905 x 295 x 10,5mm | Floating 0,3mm wear layer

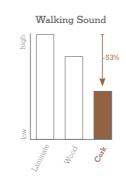

## Why is Wicanders<sup>®</sup> cork flooring the perfect choice?

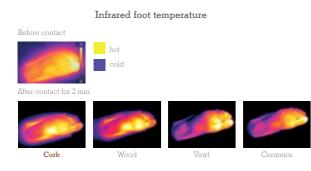

### More **silence**

Thanks to the acoustic insulation provided by cork. Wicanders floors can easily cut noise within and between rooms.

Comparing the walking sound between cork and laminate floors, tests confirm that cork floors have an exceptional result reducing the sound up to 53%. Study run by Entwicklungsund Prüflabor Holztechnologie gmbH (EPH) in Germany according to IHD-W 431

### More warmth

The natural thermal properties of cork make Wicanders floors very energy efficient, providing an optimal temperature all year round.

When testing foot temperature in contact with four different materials, cork floors stand out as being the best solution to retain heat.

Better than wood and by far better than ceramic when it comes to avoid energy dispersion.

Study run by IBV biomechanical institute in Valencia, Spain

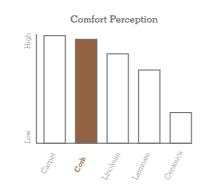

### More walking comfort

Cork floors are very comfortable to walk on, due to cork's natural and inherent flexibility, providing a unique comfort in movement.

When testing the level of comfort perception of people walking for 45 minutes over five different materials, results show that Wicanders cork floors have a great outcome.

With high comfort perception, it outperforms linoleum, laminate and ceramic floors.

Study run by IBV biomechanical institute in Valencia, Spain.

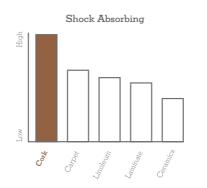

### More **body wellness**

Wicanders floors are stable enough to avoid the leg and back stress that is generated by walking on too hard or too soft floors.

Softer than laminate and harder than carpets, Wicanders cork floors are the perfect mix to reduce heel strike impacts and related body tensions, but stable enough to help the foot impulse and provide the needed stability to reduce effort on walking and decrease body fatique.

Study run by IBV biomechanical institute in Valencia, Spain.

### More impact resistance

#### Fast & Easy Installation

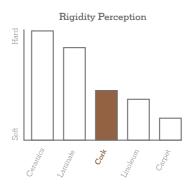

Floating floors with CorkLoc® 2G system are easier and faster to install. And in glue down floors there is no need to have a special subfloor preparation or to use a unilateral glue, so they

Low & Easy Maintenance

The special surface finishing of Vinylcomfort floors make them easier to clean and maintain.

- Due to cork's resilience and elasticity, Wicanders floors have the ability to bounce back from hard impacts.
- Tests show that Wicanders cork floors have the highest shock absorbing performance.
- When an object accidentally falls in a cork or in a laminate floor, different results come through.
- Study run by IBV biomechanical institute in Valencia, Spain.

Cork comes from the bark of the cork oak tree. It is removed from the trunk by hand without ever damaging the tree. Every year a new bark grows making it a renewable and sustainable resource.

# Think green **choose** Wicanders®

Wicanders® is a truly sustainable brand! Produced by Amorim, it represents a unique balance between the creation of wealth and the protection of the environment. The starting point is a raw material that is extracted cyclically from the cork oak trees without ever damaging them. This raw material is then transformed into high value-added products while promoting the economic and social sustainability of areas at risk of desertification.

Several eco-efficiency studies, based on a comparative analysis with several other types of flooring, illustrate the excellent environmental performance of Wicanders<sup>®</sup> products and its manufacturing process. Besides the smaller amounts of energy and raw materials required for the manufacturing process, these products actively contribute to reducing global warming, not only through their low emissions, but also due to cork's natural property of retaining  $CO_2$ .

It is estimated that the Portuguese cork oak forest – montado – is responsible for retaining 5% of the country's annual  $CO_2$  emission, representing 4.8 million tons per year.

### The importance of Cork Oak

The Cork Oak (Quercus Suber L.) is a tree belonging to the Oak family from which Cork is extracted. Its value is based not only on the products extracted from the tree, but on all of the agricultural, forest, pastoral and hunting activities that revolve around the cultivation of the Cork Oak.

Regular extraction of the Cork (a process called stripping) is a fundamental contribution for environmental, economic and social sustainability in the rural areas of the Mediterranean region where the Cork Oak may be found.

The Cork tree is a slow growing tree, which may live for 200 years, which allows it, on average, to be stripped 16 times during its lifetime. The first extraction of cork from the Cork Oak tree occurs only 25 years after planting, following which it is harvested in 9 year cycles, without ever damaging the tree in any way. This method allows the cork oak forest to fulfill its role of fixing  $CO_2$ , thus actively contributing to reduce global warming.

The Cork forest in Portugal (700.000 hectares), known as "Montado", is a typical Iberian Landscape which is key in supporting a natural bio-diversity, including some of the most endangered species in the world: Iberian Lynxes, Imperial Eagles', Black Storks, Wolves and Wild Bears.

Greenguard Certification helps the identification of interior products and materials that have low chemical emissions, improving the quality of the air in which the products are used. It promotes global sustainability, environmental health, and safety.

of January 2012, France has A pted regulations that limit VOC emissions of building ducts. Manufacturers, selling or r products in France must in a classification ranging from very low emissions) to C (high Sions). The declared goal improve indoor air quality in the declared build with wironmental Product Declaration erified document that reports nmental data of products based e cycle assessment and other ant information in accordance the international standard

Classification properties - EN 655 Wearing Group	+ EN 649 + EN 14085 EN 660-1	Thickness loos (Δlmm)	Wear group T	Wear group T	Wear group T	
Overal thickness (Vinyl + Cork layer)	ISO 24346	mm	≥ 3,0	≥ 3,0	≥ 3,0	
Thickness of wear layer (Wear Group T)	ISO 24340	mm	≥ 0,55	≥ 0,55	≥ 0,3	
Castor chair	EN 425	Visual effect - after 25 000 cycles	No disturbance to the surface other than slight change in appearance and no delamination shall occur	No disturbance to the surface other than slight change in appearance and no delamination shall occur	No disturbance to the surface other than slight change in appearance and no delaminatio shall occur	
Simulated movement of a furniture leg	EN 424	Visual effect	No damage shall be visible after testing with a type 2 foot	No damage shall be visible after testing with a type 2 foot	No damage shall be visible after testing with a type 2 foot	
Safety properties - EN 14041	Tht 10501 2	C1	70.1	70.1	70.1	
Fire resistance	EN 13501-1 EN 13893	Class Class	Bfl sl DS	Bfl s1 DS	Bfl s1 DS	
Slip Classification Formaldehyde emission	DIN EN 717-1	Class	El	DS El	El	
Electrical behaviour	EN 1815	kV	Antistatic	Antistatic	Antistatic	
Content pentachlorophenol (PCP)	CEN/TR 14823 (ihd-W 409)	mg/Kg	PCP Free	PCP free	PCP free	
Additional properties						
Stains Resistance	ISO 26987 (a)	Grade	Grade 0 (b) *	Grade 0 (b) *	Grade 0 (b)	
Thermal resistance	EN 12667	(m²K)/W	0,053	0,093	0,104	
Impact sound reduction	ISO 140-8	dB (Δ Lw)	14	16	16	
Step sound/ Step sound reduction	NF S 31 - 074	$ \begin{array}{c c} L & n,e,w & (dB)/\Delta E\rho\omega \\ (dB) \end{array} $	83/6 (c)	81	81	
Walking noise	IHD - W431	dB (A)		Reduction improvement 11,4 dB(A) Difference of loudness 45,4%	Reduction improvement 11,4 dB Difference of loudness 45,4%	

(a) The following products were tested: Desinfectant, C2H5OH, NH4OH, Citric acid, iodine, petroleum, spirit
 (b) Grade 0 - Unchanged / Grade 1 - Very little change / Grade 2 - Little change / Grade 3 - Change / Grade 4 - Strong Change
 \* Except Iodine - Grade 2 - Little change
 (c) Slab with Vinylcomfort glue down reduces the step sound in 6dB when compared with the reference slab.

Produced by Amorim, the worldwide market leader in cork products, Wicanders matches nature's most pure values with avant-garde technologies to provide high quality, ecologic and stylish flooring. Wicanders has an unsurpassed reputation for developing high standard and unique comfortable flooring solutions, following the latest decoration tendencies and targeting both residential and commercial market segments.

Wicanders is truly a sustainable brand!
